

Ski Tip

SCALE

Template for Mounting Flexi Ski Binding Shims

1. If you have printed your own template first check the scale is accurate by measuring it with a ruler →
2. Cut out square hole above (a.)
3. Punch balance chord centre on ski
3. Align cut-out over balance chord centre
4. Use grid lines to centre template on ski
5. Tape template firmly to ski
6. Punch remaining 6 hole centres (b.)
7. Remove template, drill holes, fill with glue and mount shims.

If your template is printed across two pages cut one page here and tape together.
